Plexiglass has been manufactured at the Hrastnik factory in Slovenia since 1943. Because of the irregularity of production and workshifts, the weekly and monthly output is not known. The finished product is stored in warehouses, which at present contain approximately 80 carloads of 10,000 kilograms each of plexiglass of various sizes, particularly plates for aircraft use. It is transported from the warehouses to aircraft factories and radio stations at Zagreb, Belgrade, Mostar, Sarajevo, et cetera.
